Dear NYSERDA NY NYSERDA NY,

Dear NYSERDA President and CEO Harris,

Please abandon all efforts to increase the quantity of nuclear power stations in our home state of New York. Nuclear power, even when put in place with safety guards, is never 100% reliable in terms of safety. This has been clearly demonstrated by recent events in Japan at Fukushima where nuclear waste is still be let out into the ocean, harming humans and the food chain, as well as our natural resources and environment.

We need to turn our attention urgently to renewables that are safe and provide a clean and healthy environment for our children and beyond.

Many thanks,
Louisa Anderson

Sincerely,
Louisa Anderson
